

The Comprenew Environmental Policy:

Comprenew accepts environmental responsibility for our activities and processes; including the security of data designated for destruction. We are committed to sound environmental practices and the prevention of pollution while attaining our environmental targets and objectives.

Comprenew adheres to a policy for managing used and end-of-life electronic equipment that is based on a "reuse, recover, dispose" hierarchy of responsible management strategies.

All Comprenew personnel are committed to complying with the applicable environmental requirements of the relevant legal authority, as well as the industry and any additional requirements to which the company subscribes; including the Responsible Recycling ("R2") and the e-Stewards Standards.

Furthermore, Comprenew is committed to the review and continual improvement of our EHSMS and activities to minimize impact on the environment.

Comprenew prohibits the use of forced child labor and is committed to the prohibition of prison operations throughout the Recycling Chain that involve incarcerated individuals handling Hazardous e-Waste or Customer Data, and any of the following: are subsidized by the government (directly or indirectly), involve the likelihood of risks of release or misuse of Customer Data, or do not provide workers with the same rights as private sector workers to protections from exposure to toxics.

Comprenew will perform all due diligence to mitigate the risk of release or misuse of customer data and entities that do not provide workers with the same rights as private sector workers to protect them from exposure to toxics materials.

It is important to Comprenew to make the public aware of our policy and to communicate to all persons working for, or on behalf of, Comprenew.

Comprenew will adhere to the principles of the Social Accountability 8000 International Standard (SA8000: 2014)
